

Annual/Well Woman Exam

You are having your “annual” or “well woman exam” today.

This visit, by definition, may include the following, if indicated;

- Breast exam
- Pelvic exam
- Pap smear
- Rectal exam if requested by patient
- A verbal review of your gynecologic system
- Orders for labs, mammogram and/or colonoscopy

If you want to discuss any other medical or social issues, discuss birth control management, or if you want/need prescriptions, new or refills, you will be billed for a problem visit, along with being billed for the well woman visit. All of these issues fall outside of the scope of a well woman exam.

An annual/well woman exam is not meant to take the place of a “yearly physical” by your internist or general practitioner. It is our pleasure to provide you with medical care outside of your “well woman exam,” but we will charge for these services, just like your internist or general practitioner would.

If your insurance denies payment for one of these visits, **YOU** are responsible for paying the remaining balance.
